DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claims 6,7,17 and 18 recites the limitation "said access panel" in line 2 of each claim. There is insufficient antecedent basis for this limitation in the claim.

2. The following rejections are based on the best understanding of the claimed limitations.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1,5,7,8,9 and 10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Buckley (GB 2,121,861).

Buckley discloses a water tank comprising a bottom, sidewalls, top, threaded inlet 14, threaded outlet 20, threaded drain 26 and side access panel 44. A compressor can put on the tank.

5. Claims 1,5,6,8,10 and 11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Neer (U.S. Patent Number 5,647,051).

Neer discloses a cold therapy system with intermittent fluid pumping for temperature control. Referring to Fig.5, the system comprises a container, inlet 12, outlet 11, access top panel and pump. A compressor can sit on the top.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 2,3,4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buckley (GB 2,121,861).

The openings of the access and bottom support are the design choice. Upon a close review of applicant's specification, it appears that the claimed parameters do not have any criticality and/or lead to any new and unexpected results. Applicant does not specify the deficiencies of other parameters used in the prior art. Therefore, it would have been obvious to one of ordinary skill in the art to have selected the claimed opening for the access and bottom support since these particular parameters that are no better or provided improved performance over that which is commonplace in the prior art.

Allowable Subject Matter

8. Claims 12-16,19 and 20 are allowed.
9. Claims 17 and 18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
